Portable Zer0

Zer0 is the portable version of the application developed by the renowned security team “Lucky Luscher” to help you carry out permanent data erasure. The program is quite simple and is built for performing secure deletion tasks, mainly for the data you don’t need anymore. You should take into account that a normal deletion process doesn’t ensure that your sensitive data is completely wiped out from your system, so the information can be retrieved using dedicated recovery tools. Zer0 features secure cleaning capabilities for making sure no traces are left on the system when removing a file from the computer. The advantages of being portable Since this is the portable version of the program, it is important to mention that it doesn’t leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to delete files permanently from your computer on the breeze, without having to go through installation steps. Simplistic layout and basic functionality You are welcomed by an intuitive layout that allows you to carry out most operations with minimal effort. Everything is kept as simple and clear as possible, so even rookies can configure the dedicated parameters on the breeze. Zer0 gives you the possibility to add the files that you want to delete using the built-in browse button or “drag and drop” support. On the downside, the utility is not able to process folders but it lets you wipe out multiple files at the same time. During our testing we have noticed that Zer0 carries out a task very quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not hampered. Bottom line To sum things up, Zer0 seems to be the right choice in case you are looking for a simple-to-use application that comes bundled with only a few functions for helping you carry out secure deletion operations. Portable DataWipe is a portable data eraser for computers and mobile devices. It is an easy-to-use and reliable application for securely deleting data and files from your computer and mobile devices. DataWipe is a sophisticated system which can completely erase sensitive data and files from a computer and mobile device even if they have been recovered. In addition, DataWipe supports the use of security certificates to verify the execution of the application. Portable DataWipe Features: - Data erasure - Data security
